GETTING STARTED WITH
BUCKEYE ONLINE BANKING

updated 11-10-2024
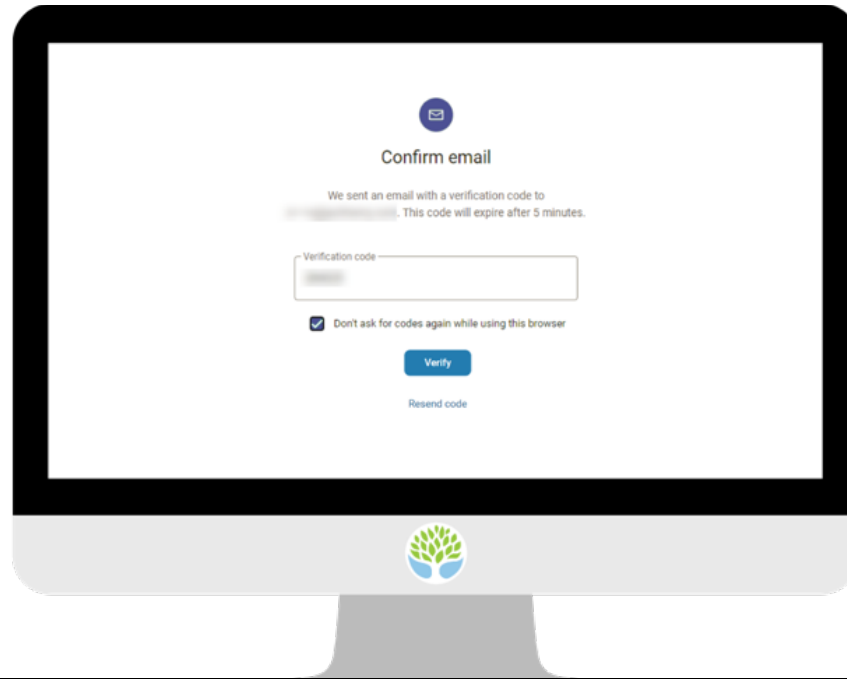

|	
1. Visit the Buckeye Community Bank website at buckeyebank.com. Select the login link at the top of the page. (After you set up your new account, please remember to delete any old bookmarks. You can bookmark the new online banking login address at my.buckeyebank.com)	
2. Use your current Buckeye login credentials to access the online banking system the first time.	
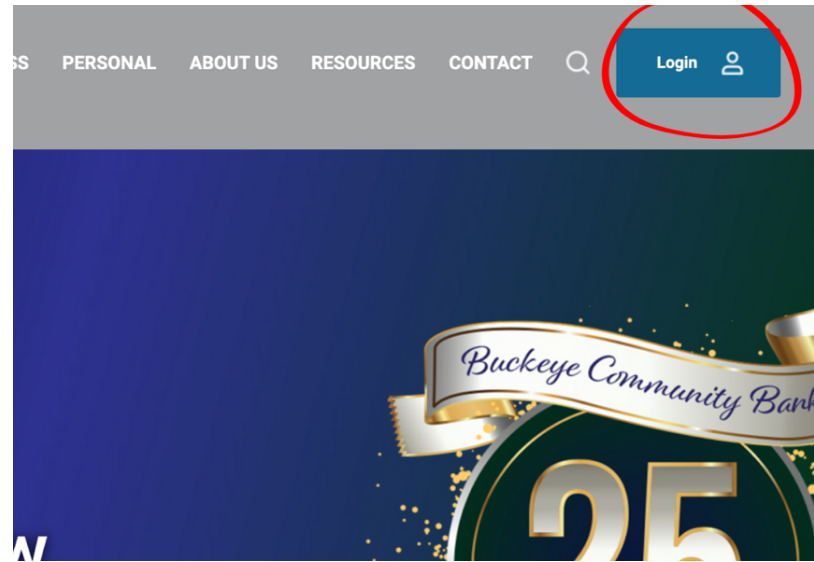

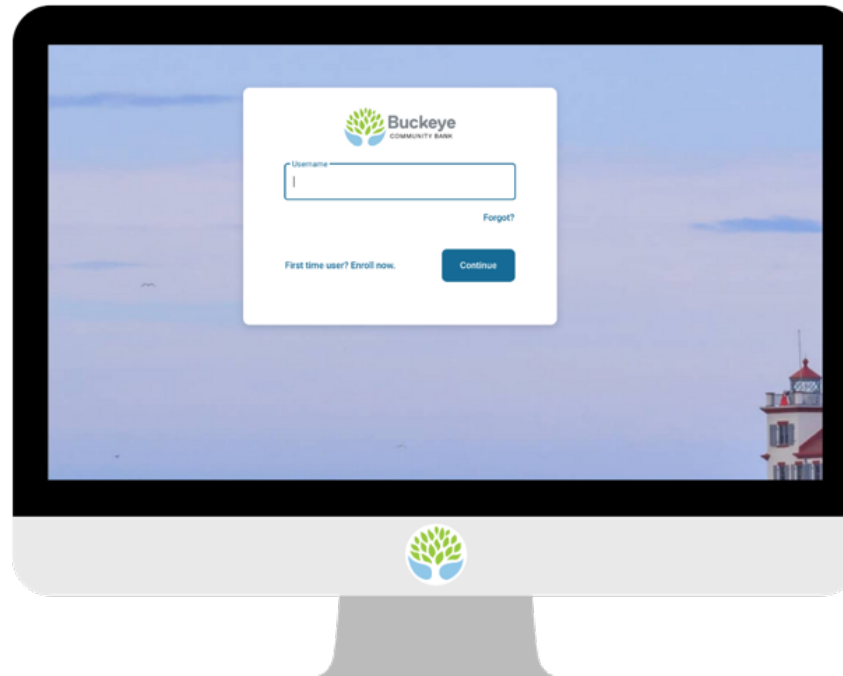

**3. Confirm your preferred email address to** verify your Buckeye account contact email.

Confirm email

We sent an email with a verification code to ████████████. This code will expire after 5 minutes.

Verification code

☑ Don't ask for codes again while using this browser

Verify

Resend code

4. Check your email for the code and return to the Buckeye online banking page to enter it.

Buckeye COMMUNITY BANK

Your one time passcode is
284325

If you did not request a one time passcode, please call (123) 123-1234 immediately.

5. Follow the remaining prompts to set up two-factor authentication and continue setting up your Buckeye online account. You can set up authentication using text message, phone call, the Authy app or another authentication app.

6. Set up two-factor authentication via your choice of a voice or text message, the Authy app or another authenticator app.

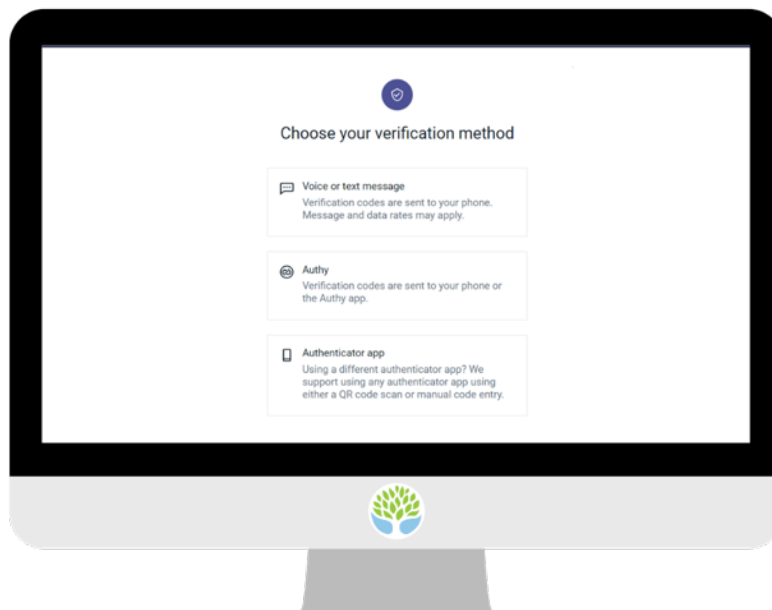

7. If you choose voice or text message, verify the phone number you want to use to verify your Buckeye online account. *(You do not need to input the same phone number Buckeye has on file for your account. You should use the phone number associated with the device on which you want to receive the authentication code.)*
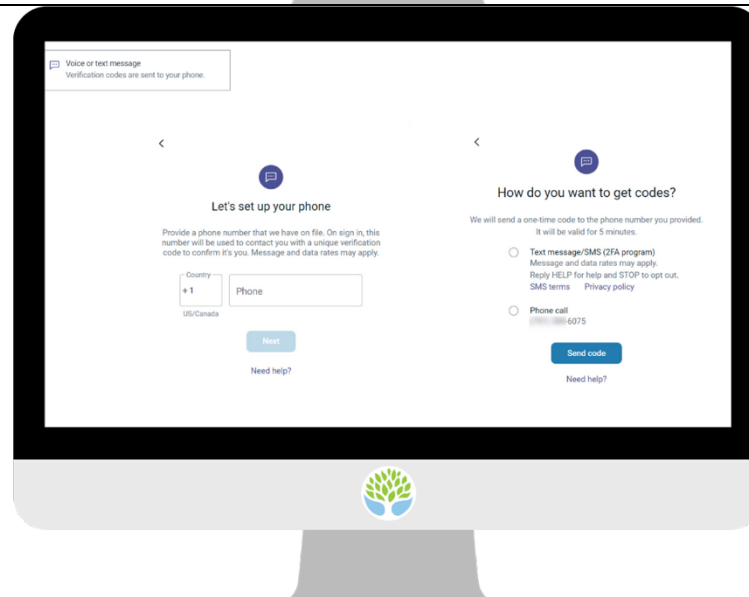

8. If you decide to use the Authy authenticator app, follow the onscreen instructions to set it up.
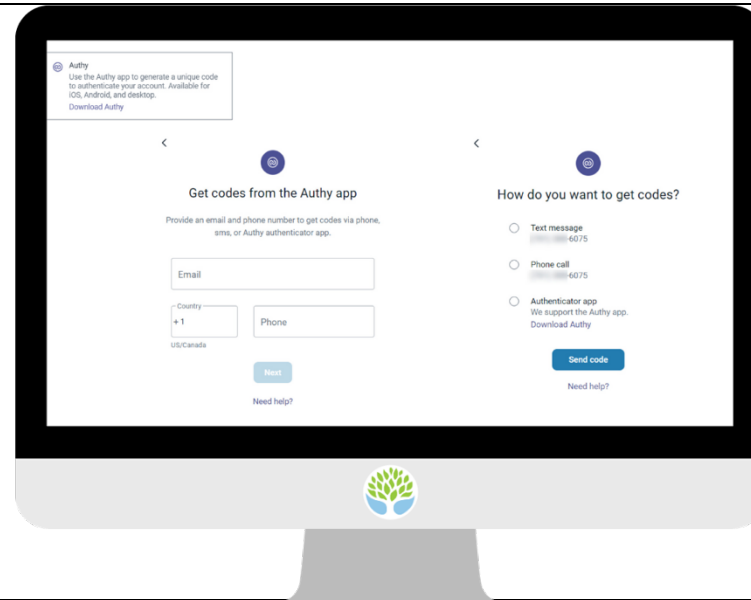

9. If you chose another authentication app, follow the onscreen instructions to set it up.
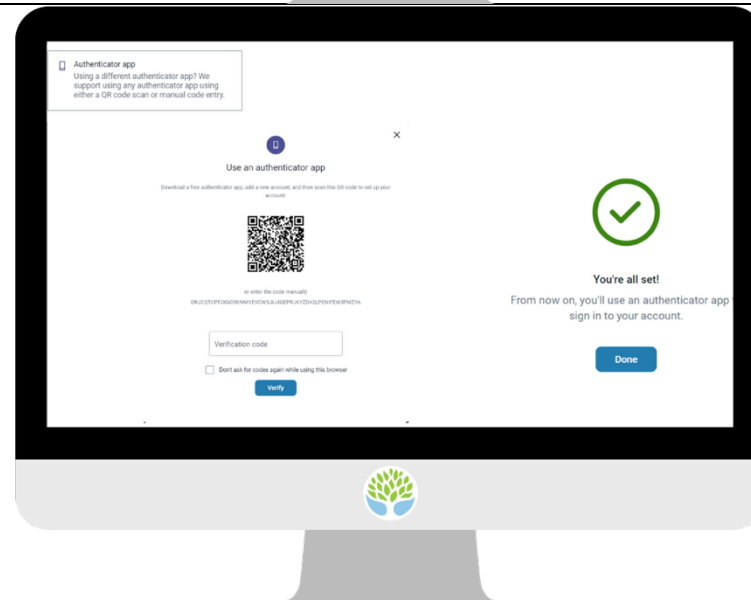

| **10. Setup Complete.** Now you're ready to manage your account through Buckeye's online banking system. | |
